SAIRAJ BANDRE

Dublin, Ireland | sairajbandre16@gmail.com | linkedin.com/in/sairajbandre/ | github.com/SairajBandre16

SUMMARY

AI-focused Computer Science postgraduate (B.E. in Artificial Intelligence & Data Science) with hands-on experience building AI agent workflows, automation, and data pipelines in production, plus deep learning, computer vision, and NLP projects. Two published research papers. Skilled in Python, SQL, and machine learning frameworks (TensorFlow, PyTorch), with a track record of taking problems from data to model to working solution. Seeking AI / Machine Learning roles.

SKILLS

Languages: Python, Java, SQL

ML / AI: Machine Learning, Deep Learning, NLP, Computer Vision (OpenCV), TensorFlow, PyTorch, LLM Agents

Automation & Data: AI Workflow Automation (n8n), RPA, Data Pipelines, SQL Reporting, API Integration, Backend Automation, Debugging

Frameworks & Tools: Flask, Streamlit, Next.js, React.js, Flutter, Selenium

Soft Skills: Problem-Solving, Collaboration, Communication, Reliability, Ownership, Adaptability

PROFESSIONAL EXPERIENCE

Executive – Supply Chain Management & Automation Operations | *Ergode* Jan 2026 – Jul 2026

- Built and owned live automation systems processing high-volume orders across multiple seller portals (Walmart DSV, Shein), improving accuracy, throughput, and reliability.
- Developed automated data pipelines and SQL reporting tools that turned operational data into actionable insight on shipping variance and shipper performance.
- Solved a hard integration gap by building RPA-driven automation for Amazon Seller Central workflows not covered by the SP-API, removing manual handling of high-volume processes.
- Debugged, optimised, and scaled automation systems with cross-functional teams, quickly learning unfamiliar codebases to improve reliability and performance.

AI Intern | *Ergode* Aug 2025 – Jan 2026

- Designed and deployed AI agent workflows using n8n to automate tasks across departments, turning stakeholder requirements into working, maintainable tools.
- Built automated report generation from databases and Excel, delivering accurate, timely output to support data-driven decisions.
- Implemented RPA tools to eliminate repetitive manual tasks, improving data quality and saving employee time.

PROJECTS

RainWise – Smart Rainwater Harvesting — *Flutter, Python, Deep Learning*

- Trained a deep learning model on Indian weather data to predict rainfall and delivered it end to end in a mobile app that recommends rainwater storage solutions, taking the project from data to model to user-facing insight.

Scan To Measure — *Python, OpenCV*

- Built a real-time object size measurement system using OpenCV and ArUco markers, with an image processing pipeline for accurate object detection and localisation.

News Summarizer — *Next.js, Flask, Python, NLP*

- Developed a full-stack NLP application that automatically summarises news across categories, improving user access to key information.

PUBLICATIONS

- "RainWise – Smart Rainwater Harvesting," International Conference on Computing, Communication, and Networking Technologies, 2025.
- "Scan To Measure," International Journal for Research Trends and Innovation, 2023.

EDUCATION

MSc Computer Science (Negotiated Learning) | *University College Dublin, Dublin* 2026 – 2027

B.E. Artificial Intelligence & Data Science | *SIES Graduate School of Technology, Nerul* 2021 – 2025
